AUTUMN WITH DRESÓWKA.PL
Part I

fabric

SOFTSHELL

Softshell is a fabric which consists of three layers: outer polyester, membrane and inner fleece (which gives its users comfort and warmth). Thanks to its structure the fabric is totally windproof and yet breathable. It has a membrane. It doesn't absorb water or dirt. Softshell clothes are perfect for spring and autumn seasons, and with an appropriate insulation perfect also for winter. Softshell fabric is perfect for jackets, trousers, sportswear/trekking clothes. But also you can make original bags and backpacks.

Softshell fabrics available in DRESÓWKA.PL
